

The screenshot shows a Jira card titled "TestingUser Login Module" with a green checkmark icon. The card is in the "Done" column. It features a header with a green checkmark and the title. Below the header, there are buttons for "+ Add", "Labels", "Checklist", "Attachment", and "Location". The card is assigned to "DP" (Dev Patel) and has a due date of "Mar 9 - Mar 10, 1:25 PM" with a "Complete" status. The card description includes "Hii!". Below the description, there are three sections: "Design", "Coding", and "Checklist", each with a 0% progress bar and an "Add an item" button. There is also a "Unit Testing" section with a checkbox and an "Add an item" button. On the right side, there is a "Comments and activity" section with a "Show details" button and a comment from "DP" (Dev Patel) stating "Dev Patel added this card to Product Backlog" 14 minutes ago.

The screenshot shows the Jira Automation Rules configuration page. The left sidebar contains a menu with "Automation" at the top, followed by "Rules" (selected), "Scheduled", "Due date", "Custom buttons", "Card buttons", "Board buttons", "App automations", "View apps", "More", "Suggestions", and "Activity". The main content area is titled "Rules" and has a "Create automation" button. Below the title, there are three rules listed, each with a "when" condition and an "Enable on this board" toggle.

- Rule 1: "when all checklists are completed in a card by me, move the card to the top of list 'Done'"
- Rule 2: "when a due date is set on a card by me, move the card to the top of list 'Done'"
- Rule 3: "when the green label is added to a card by me, move the card to the top of list 'Testing'"

Each rule has an "Enable on this board" toggle that is currently turned on.
